## Piano Motion Symbols

### Introduction

This is an idea for a notation for that might extend fingering notation from just numbers to additional symbols, indicating how the hands and body might move.

I hope this might help create awareness of the body and help with piano technique.

Piano playing may involve:

- position, move, stretch, turn, press, stress or hold stationary
- fingers, wrist, arm and torso
- in x, y or z directions.

Not all body parts or motions seem equally involved.

These symbols aim to be a quite literal representation of body and motion, while still schematic and hopefully not ambiguous.

### Basic Elements

---

	Finger		Move		Press
	Fingers		Stretch		Loose
	Wrist		Turn		Tight
	Torso / arms		Stationary		Slightly (braces)

### Three Dimensions

Depicting things in 3 dimensions, the symbols may be like looking down at the hands in a sort of perspective projection. To represent depth, diagonal lines might be used. Here is how some things might work in 3 dimensions:

	Move left / right		Turn facing you
--	-------------------	--	-----------------

Move toward black / white keys

Turn forward / backward

Move into keys

Turn side to side

Move out of keys

## Turning

Turn facing you  
(clockwise)Turn facing you  
(counter-clockwise)

Turn right

Turn left

Turn left / right

Turn forward

Turn backward

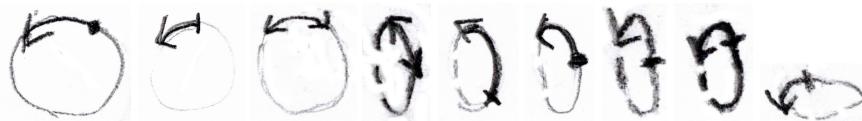

Turn forward / backward

The dashed line may depict it being further away.

## Turning Arc

The beginning might be marked with a dot or a dash.

## Nuance

Nuance, like press *a little* or move *a lot*, may be written down like this:

	<b>Restfully</b>	<b>Slightly</b>	<b>Normally</b>	<b>Exaggerated</b>
<b>Press</b>				
<b>Move</b>				
<b>Tight Wrist</b>				
<b>Loose Wrist</b>				

## Tension & Release

	Reach sideways	Then let go, move hand back.
	Reach sideways	Then let go, move hand back.
	Stretch	Stretching fingers wider. But trying to release soon.
	Reach black keys	If arpeggiated, might prefer crossing over instead.
	Reach white keys	If arpeggiated, might prefer crossing over instead.
	Stretch diagonally	Composite of stretch sideways and reach for black keys.
	Finger move into keys	Pressure coming out of the fingers.
	Arm move into key	Pressure coming out of the arm.
	Hand resting on keys	
	Hand resting on lap	

## Jumps

	Hand upward (right)
	Hand upward (left)

---

	Gravity assist (right)	Falling into key with gravity.
	Gravity assist (left)	Falling into key with gravity.
	Bowy jump (sideways)	
	Controlled jump (sideways)	Though grace might desire a bowy move, a jump may be rather big, and might need some control, so perhaps move toward first, then press.

## Cross Over

May feel semi-smooth.

---

	Cross over (large)		Thumb under finger / right hand		With wrist turn (thumb under finger / right hand)
	Cross over (small)		Finger over thumb / right hand		With wrist turn (finger over thumb / right hand)
			Thumb under finger / left hand		With wrist turn (thumb under finger / left hand)
			Finger over thumb / left hand		With wrist turn (finger over thumb / left hand)

---

## Fingers

This might be used to say something specific about a finger in terms of motion, tension or otherwise.

### Finger Position

And different amounts of fingers.

	<b>Curved / High Fingers</b>	<b>Pronounced Fingers</b>	<b>Flat Fingers (upward)</b>	<b>Flat Fingers (downward)</b>
<b>1 Finger (Left)</b>				
<b>1 Finger (Right)</b>				
<b>2 Fingers</b>				
<b>3 Fingers</b>				

	<b>Curved / High Fingers</b>	<b>Pronounced Fingers</b>	<b>Flat Fingers (upward)</b>	<b>Flat Fingers (downward)</b>
<b>4 Fingers</b>				
<b>5 Fingers</b>				

# **Fingers Stationary**

	<b>Curved / High</b>	<b>Pronounced</b>	<b>Flat</b>	<b>Number</b>
Fingers Stationary (left / right / 1 finger)	17/	17/	17/	14/
Fingers Stationary (left / right / 3 fingers)	13/	157/	12/	
Fingers Stationary (in / out of keys / 1 finger)	2	2	3	4
Fingers Stationary (in / out of keys / 3 fingers)	13/	14/	14/	
Fingers Stationary (toward black / white keys / 1 finger)	2	2	2	4
Fingers Stationary (toward black / white keys / 3 fingers)	13/	12/	12/	

## Finger Move

### Finger Press

May be usually downward into the keys, not likely in other directions.

### Finger Enunciation

Move fingers restfully

Move fingers slightly

Move fingers normally

Move fingers exaggerated

## Finger Switch

1|5

Switch finger (in place)

Part of existing fingering notation.

Switch finger (at different times)

At different times same key with different fingers.

## Wrist

### Wrist Position

With flat fingers

Pronounced

Curved

High

Tilted (flat fingers)

Tilted (pronounced)

Tilted (curved)

Tilted (high)

### Wrist Stationary

Stationary (left-right)

Stationary (toward black / white keys)

Stationary (in / out of keys)

Stationary (composite)

### Wrist Move

Wrist move (left / variation 1)

Wrist move (right / variation 1)

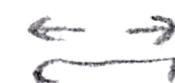

Wrist move (right and left / variation 1)

Wrist move (left / variation 2)

Wrist move (right / variation 2)

Wrist move (right and left / variation 2)

Wrist move (into keys)

Wrist move (in / out of keys)

Wrist move (out of keys)

Wrist move  
(toward black  
keys)

Wrist move  
(toward white  
keys)

Wrist move  
(toward black and  
white keys)

These wrist moves may be the same as wrist turning:

Wrist move  
(into keys / left)

Wrist move  
(out of keys / left)

Wrist move  
(in or out of keys / left)

Wrist move  
(into keys / right)

Wrist move  
(out of keys /  
right)

Wrist move  
(in or out of keys / right)

Wrist move  
(toward black  
keys / right)

Wrist move  
(toward white  
keys / right)

Wrist move  
(toward black and white  
keys / right)

Wrist move  
(toward black  
keys / left)

Wrist move  
(toward white  
keys / left)

Wrist move  
(toward black and white  
keys / left)

A composite, to show some flexibility:

Wrist move (composite)

## Wrist Press

May be usually downward into the keys, not likely in other directions.

Wrist press (variation 1)

Wrist press (variation 2)

Wrist press (right)

Wrist press (left)

## Wrist Turn

Wrist turn (right) / 'pivot'

Wrist turn (left) / 'pivot'

wrist turn (right and  
left) / 'pivot'

wrist turn (facing you / right)

wrist turn (facing you / left)

wrist turn (facing you  
/ right and left)

Wrist turn (forward / right) /  
'flap'

Wrist turn forward (left) /  
'flap'

Wrist turn (backward / right)  
/ 'flap'

Wrist turn backward (left) /  
'flap'

Wrist turn (forward and  
backward / right) / 'flap'

Wrist turn forward and  
backward (left) / 'flap'

## Wrist Stress

(Combined with wrist positions.)

Wrist tight (flat fingers)

Wrist loose (flat fingers)

Wrist tight (pronounced)

Wrist loose (pronounced)

Wrist tight (curved)

Wrist loose (curved)

Wrist tight (high)

Wrist loose (high)

## Torso

Torso (+ arms)

Torso sway (right)

Torso sway (left)

Torso tilt forward

Torso tilt backward

Torso turn sideways (back and legs)

## Arm

Arm outward (left)

Arm inward (left)

Arm placing torso in front of right hand

## Elbow

---

Elbow sideways

## Some Fingers Deeper In Keys

3 fingers:

	<b>Flat Fingers</b>	<b>Pronounced Fingers</b>	<b>Curved Fingers</b>
<b>Mid finger deeper in keys</b>	↑	↗	↷
<b>Outer fingers deeper in keys</b>	↗	↖	↷
<b>Right finger deeper in keys</b>	↖	↖	↷

4 fingers:

	Flat / outer fingers deeper in keys
	Curved / outer fingers deeper in keys
	Curved / 3rd finger deeper in keys

## Composites

To demonstrate some possibilities for flexibility.

	Fall in and then raise out of key
	3 fingers: flat, pronounced and curved
	Curved wrist flapping, mid finger pressed
	Curved wrist hopping. 1st and last note pressed. Middle note moved toward black keys, pressed with 3rd finger.
